

# Find Books and Journals By Subject

UTS Library uses Dewey Decimal classification to assign `subject` or call numbers to Library items. The call number on each item indicates where you should look on the Library shelves. Use the call numbers listed on the next page if you want to browse the shelves in a subject area.

For further assistance with finding your way around the Library, locating books, exam papers, journal articles and other information ask Library Staff at the Enquiries & Loans Desk, at the Research Help Desk or visit [lib.uts.edu.au](http://lib.uts.edu.au).
