News

• On 14 August, UTS Library started moving the low-use items in the Kuring-gai Library collection to the Library Retrieval System (LRS).
• The Library also announced its plans to refurbish the City Campus Library during the Christmas break.
• A range of new study areas will be constructed on levels 2 - 5, and the furniture will be rearranged to create better spaces for individual study and group work.

Fun Facts

• The LRS is the only Australian automated storage retrieval system to use RFID and touch-screen capabilities
• There are six 15 metre tall cranes, allowing access to 12,000 storage bins
• Over 800 LRS items were successfully loaned in the first month of operation!
• The most popular days of the week for requests are Tuesdays and Wednesdays
